# Role of Sector Intermediaries

# Sector Intermediaries help to scale existing CCL programs through engagement with employer and labor partners across sectors

# Sector Intermediaries are creating sector-specific strategies and supporting implementation of these strategies

---

## **Sector Strategy Development:**

Work with employers to identify what priority actions we can take to accomplish our goal of employers working together to grow/scale CCL programs

Sector Intermediary activities include:

- Work with employers and CCW partners to develop an industry-aligned sectoral strategy which will significantly increase the number of sector employers who adopt Career Launch, Career Prep, and Career Explore programs as their preferred talent training and recruitment solution
- Understand the demand for talent and the skills/competencies needed for high-quality entry level jobs
- Map demands against available CCL programs
- Identify high quality existing programs to scale and identify gaps where new programs are needed
- Compile data into industry-aligned sectoral strategy with clearly identified leadership and timelines for completion

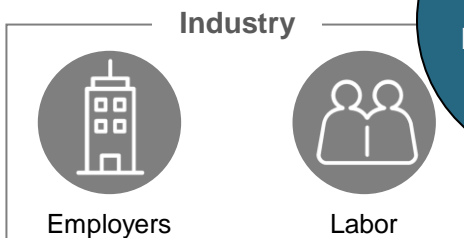

**Goal: Increase student enrollment & employer participation  
in Career Launch, Prep, and Explore programs**
